DATE: 15 February 1955

SUBJECT: Project 35.512, Interim Study of USSR Shipyards in Economic Region V.

1. This project contains nothing which requires statistical review. It is a collection of worksheets for Region V and part of a series which will be combined to cover all USSR shipyards. This collection will be of value chiefly to I/SH. If these worksheets are to be used as a basis for shipbuilding estimates, some documentation is required.

2. I question whether publication as a Research Aid is necessary. Ditto reproduction would serve the same purpose less expensively.
